State of Kuwait

Introduction

We have reviewed the accompanying interim condensed consolidated statement of financial position of Bayan Investment Holding Company K.S.C.P. Management of the Parent Company is responsible for the preparation and presentation of this interim condensed consolidated financial information in accordance with International Accounting Standard 34, "Interim Financial Reporting". Our responsibility is to express a conclusion on this interim condensed consolidated financial information based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed consolidated financial information is not prepared, in all material respects, in accordance with International Accounting Standard 34.

Report on Other Legal and Regulatory Requirements

11. Outbreak of geopolitical conflict

The Group operates within a global and regional economic environment that remains influenced by escalating geopolitical tensions in the Middle East. Recent developments in the region have led to increased uncertainty in financial markets, energy supplies and costs, and the global geopolitical and trade landscape. The wider regional impact of these events may affect economic conditions relevant to the various sectors. Management has assessed the potential impacts of the geopolitical situation on the Group's operations and financial position, taking into consideration:

- Macroeconomic conditions, including inflationary pressures, interest rate volatility, and economic growth trends.
- Fair value volatility of investments, particularly those exposed to emerging markets, energy-sensitive sectors, or regions indirectly affected by supply-chain disruptions and energy market instability.
- Financial market volatility, including its impact on the valuation of investments or on the prices of owned or observable shares during periods of heightened volatility.
- Supply-chain disruption, including delays in shipping, higher production costs, increased congestion at ports, and increased freight and insurance costs.
- Impact on industrial operations, including supply risks from suppliers or changes in product prices or raw material prices.
- Foreign exchange risk, arising from increased currency volatility in markets linked to the region.

As at the reporting date, the Group has not experienced any material disruption to its core operations. Accordingly, management has not identified any material adverse impacts on the overall valuation of the investment portfolios or property, plant and equipment that require specific adjustment beyond those reflected in observable market prices and valuation inputs. However, future adverse developments in the geopolitical environment may result in changes to key valuation assumptions.

The Group maintains liquidity buffers and capital resources that management considers sufficient to meet its commitments and operating expenses as they fall due. The Group has assessed the potential impact of adverse market movements on its ability to realize investments or access funding, including under stressed market scenarios. No breaches of liquidity thresholds, investment restrictions, or capital management policies were identified as at the reporting date.

Management has also considered the impact of these events on the Group's ability to continue as a going concern and concluded that the going concern basis remains appropriate. The geopolitical situation remains dynamic, and the extent and duration of potential impacts on global financial markets are uncertain. Management continues to monitor developments closely and will reflect any material impacts in future valuations, risk disclosures, and financial reporting as appropriate.
